## FAQ

- How to adjust the probability balance of the quiz from the first word to the second?
- The smart algorithm manages the direction on its own, but you can manually adjust the desired probability in the Settings page.
  
- Is it case-sensitive, as well as spaces?
- No, you don't have to worry about letter case, leading and trailing spaces.
  
- How to edit or delete a pair of memo word keys?
- After passing the quiz, you can click on the Edit button. There will also be a Delete option.
  
- What are the limitations of the free version of the app?
- The free version of the app allows you to create and recall up to 100 key pairs. The purchase option removes the limit and gives you the ability to create and recall an unlimited number of word keys in the app.
